PROFILE

I'm a passionate web developer and UI/UX designer with a B.Tech degree in Computer Science Engineering (CSE). Passionate and dedicated web developer with a strong foundation in web development, driven by a deep enthusiasm for front-end web development and a keen interest in UI/UX design principles. Proficient in HTML, CSS, JavaScript, React.js, PHP, MySQL, and Flutter, I specialize in crafting user-friendly interfaces, building server-side applications, and creating cross-platform mobile apps. With a passion for problem-solving and a commitment to quality, I thrive in fast-paced environments and look forward to contributing to innovative projects.

PROJECTS

BuddyBase - Social Media Platform

- Independently conceived and developed BuddyBase, a social media platform, using **HTML, CSS, JavaScript, PHP, and MySQL**.
- Designed and implemented features for user profiles, verified users badges, add posts, and delete posts, share their thoughts. Managed the database structure for optimal performance.

macOS Ventura Simulator

- The macOS Ventura Simulator is a web-based application that replicates the user interface and functionalities of the macOS Ventura operating system using **HTML, CSS, and JavaScript**. This project was conceived as an exploration into front-end web development, aiming to recreate the aesthetics and interactions of the macOS Ventura experience within a web browser.
- The simulator faithfully mimics the visual elements of macOS Ventura, including the menu bar, dock, and macOS bootup screen. It provides users with an authentic interface reminiscent of the real operating system.

Portfolio Website

- Created a personal portfolio website using **React, HTML, CSS, and JavaScript** to showcase a collection of personal projects, skills, and accomplishments.
- Designed and implemented the website's user interface, ensuring a responsive and visually pleasing design. Developed interactive components and animations using React for a seamless user experience.
